

Leveraging today's technology  
for your business success

## ABOUT CORNERSTONE CONSULTING

At [Cornerstone Consulting](#), our goal is to help your business achieve NET success. Our elite clients receive superior technological solutions, advanced business information systems, and exceptional training. By focusing on the infrastructure of your business, we'll work together with you to create or improve upon:

- Existing computer networks
- Intranet and e-commerce systems
- Website design, hosting and search engine optimization
- Hardware and software
- Educating your staff to manage the acceleration and generation of your increasing profits

We are proud of the quality of outstanding service we provide to our clients. Maintaining our established reputation of excellence and being revered as the leading provider of MIS/IT is of the utmost importance to our organization. Not only is Cornerstone renowned as a reseller of SAP Business One and Sage Software\*, we are recognized yearly as one of **Accounting Today's Business Pacesetters**. Our knowledge of accounting software, electronic commerce, computer custom programming, internet, and network systems can work to your advantage now. Let our many years of experience benefit your company's revenue generating interests.

[Cornerstone's team](#) includes MBAs, CPAs, MCSEs, and MCPs. We are Certified Sage Software\* Consultants for product, options, and ad-ons. We are also Certified SAP Business One Consultants. Our team also includes Certified Visual FoxPro, Cold Fusion, SQL, and .NET programmers that can superbly install, tailor and support your automated systems. We are a Certified Solution Provider for: the entire Microsoft product line; Symantec Norton Anti-Virus, and Veritas back-up programs.

**Cornerstone's team** of dedicated employees can enhance an existing system or could specifically design programs to suit the needs of your growing company. Not only are we highly skilled in software installation, configuration and modification, we are also an authorized Dealer for IBM, HP/Compaq, and Dell hardware. Further, we can make recommendations for Cisco, Intel processors, and 3Com products, based on your company's needs. We are known for being innovators in website integration with back- end systems and are famous for sophisticated web site design and enhancement (i.e., installing catalogues or shopping carts) capabilities. Cornerstone has over 100 combined years of computer programming experience to reinforce our exemplary service. From the moment you inquire about Cornerstone, we are ready to provide exceptional technical support and guidance for your business. Our consulting services will be available to you, for as long as you may need our services.

**Cornerstone's projects** are always as diverse as they are exciting. One proposal may entail installing Sage Pro ERP or SAP Business One accounting software package and its related systems for a business consisting of ten employees. In contrast, another client's business may require hardware/peripherals, payroll, manufacturing, LANs/WANs/Networking, EDI, and CRM installed, in addition to an accounting software package for hundreds of employees in different locations throughout the world. From PowerPoint presentations to full-service end-to-end projects that may include vertical applications, e-commerce internet sites, and accounting software and hardware, no project is insignificant to Cornerstone. Our vertical industry niches include, but are not limited to: Manufacturing, Distribution, Pharmaceutical, Nutraceutical and Retail/Wholesale enterprises.

**Consulting** - We provide comprehensive consulting that starts with an analysis of your existing hardware, network and business systems. We review the analysis with you and together we develop the best system to implement for your company.

**SAGE (SBT/ACCPAC) and SAP Support** - Our trained professionals are dedicated professionals that will work to keep your critical systems running smoothly.

**Installation** - Our Sage Software\* and SAP Business One qualified installers and Microsoft Certified Network Engineers can install, implement and provide exceptional support for your computer system.

**Training** - Understanding how to use your system is crucial. For that reason we have accountants, Sage\* and SAP Business One professionals, and computer experts on-staff that can provide training programs designed to increase staff productivity.

**Customization** - You can optimize your business processes and modify your Sage\* or SAP Business One system to increase productivity.

**Report Design** - Being able to generate key reports enables you to make smart business decisions. Let us create automatic reports for you. Our reports can save you hours of number crunching.

**Macro Development** - Eliminate day-to-day tasks. Allow us to automate the common procedures that take up your valuable time.

**E-Business Solutions** - Cornerstone Consulting is employed by prestigious companies because we can deliver the most powerful e-Commerce business solutions. Our e-Business solutions are preferred due to the integration capabilities. We provide integrated accounting, inventory and e-commerce as one unified system to clients. ## COMGINE E-COMMERCE

**With Comagine's seamless and comprehensive e-commerce, accounting and inventory integration** you no longer have to use disparate, non-integrated programs for web order fulfillment. By combining powerful state-of-the-art E-Commerce, Accounting, and Inventory Management software into one unified application, our client's online revenue generation occurs with minimal human intervention. With Comagine's automated web order processing system, Internet sales success is achieved without wasting company time or resources.

**No Costly Infrastructure Expenses  
Entire Comagine System Can Be Hosted**

**Due to its integration of e-commerce, accounting, inventory and multi-purpose platform design,** Comagine offers substantially more power than typical E-Commerce shopping cart systems. There are numerous built-in features that enhance business efficiencies to help drive your web store's online success: credit card processing, SEO tools, promotional offers, special customer pricing, discount coupons and more. Comagine not only opens new streams of online revenue and contacts, it streamlines business processes and makes your entire enterprise more efficient.

**Comagine Can Be Installed On Your Server(s)**
